

Welche Steckplätze der PSU für GPU?

Beitrag von „fabiosun“ vom 13. Februar 2025, 11:32

i bought this in 2017* and i use it from that time

<https://www.amazon.it/gp/product/B01CIP5S8I/>

it works wonderfully in my rig also in this new dual gpu condition:

*Only PSU is the same..i had , x99,x299, dual xeon WS, Threadripper 3970x and other platforms in these years.
