

Software Ryzen Kompatibilität

Beitrag von „fabiosun“ vom 22. April 2025, 16:23

[Zitat von griven](#)

[fabiosun](#) he uses a quite special software (e-on VUE <https://www.bentley.com/software/e-on-software-downloads/>) which is used for photorealistic modeling/rendering of Landscapes and Plants and obviously relies on OpenCL/GL...

thank you griven

I am not familiar with it but it seems to work well, i don't know if it uses both my gpus, but it renders well

I have no experience with this software but if user needs some test i can follow his instructions
