Erledigt **Thinkpad T60 won't boot Lion?!**

Beitrag von „HackintoshBen43" vom 18. Oktober 2013, 06:22

Hi all,

I am trying to boot Lion 10.7 (GM) on my Thinkpad T60. I've tried nearly over 20 times probably at this point and it just won't boot. I am so angry at this laptop, I am about ready to toss the darn thing out my bedroom window! Anyway, I tried -x -v npci=0x2000 -f UseKernelCache=No, etc. no boot flags will make this thing boot. The [hardware](#) i'm using is an Intel Core 2 Duo 1.83ghz processor, ATI X1300 gpu, Atheros AR9285 wifi, Intel E1000E ethernet, soundmax audio..the laptop works in 10.6.7 (Snow Leopard) but that OS is really out of date, i'd rather use Lion if possible..
