I will make a new Pack.

If i have time, mayby in the evening.

At the moment my WLAN and LAN don't work together.

Have you already changed your WLAN?

I have order lenovo branded wifi card, because I do not want to make bios mods (I do not have windows pc and also do not want to risk to brick my laptop for card that costs less then 6€, also I have no experience with bios mods) so when my card arrive I will try it and tell you how it works with lan
