

SysInfo

Beitrag von „apatchenpub“ vom 4. Oktober 2015, 23:20

The screenshot displays the SysInfo application interface, which provides detailed hardware information for a Hackintosh. The interface is organized into several sections:

- System Overview:** A summary table at the top listing various components like CPU, RAM, Storage, and Network cards.
- System Details:** A detailed view of the system's hardware components, including the motherboard, CPU, RAM, storage, and network cards.
- System Information:** A section providing details about the operating system, including the version, build, and kernel.
- System Settings:** A section for configuring system settings, such as the system name and user name.

The hardware details section is particularly comprehensive, listing the following components:

- Processor:** Intel Core i7-4790K (3.5 GHz)
- Memory:** 16 GB DDR3-1600
- Storage:** Samsung 840 EVO 128 GB SSD
- Network:** Intel Ethernet Controller GbE
- Audio:** Realtek Audio Controller
- Graphics:** NVIDIA GeForce GTX 970
- Keyboard:** Apple Keyboard
- Mouse:** Apple Mouse
