Help. Brush into the OSZOSIS Z77X-UD3H 1.11669 and 166x does not lead to black

Beitrag von „lostdream“ vom 4. Juni 2016, 04:51

For help. Brush into the OSZOSIS Z77X-UD3H 1.11669 and 166x does not lead to black

Two versions were released.Z77XUD3H-20e-OZM-DSDT-G-166X_M.rom and Z77XUD3H-20e-OZM-DSDT-G-166X_M.rom DoeJohn.

The basic configuration of the computer is I5 3570k CPU motherboard Z77X-UD3H 1.1 graphics sapphire R9 290

I come from China. Domestic too little information. There is no way to come to your station for help. I hope people give advice. Thank you.

The system is CLOVER. The original 10.10. 5 Yosemite installed

I think, you should use the first one from [@griven Ozmosis Mod für Z77X-UD3H](#)
Remove R9 290 for the installation
