Nullcupower kext

Beitrag von „AceWeal“ vom 31. August 2016, 19:33

Hello

Not the system boots without this Kext what to do? I5 3570k

Beitrag von „Fredde2209“ vom 31. August 2016, 20:03

Hello 😊

Could you please tell us in detail what problems you have to deal with? Your description is a little bit too short to gather enough information to help you. Thanks

Try it with the following DSDT.

Put it on the hidden EFI-Partition into the folder /EFI/Oz/Acpi/Load.

Hello
Not the system boots without this Kext what to do? I5 3570k

Is the System booting with the NullCPUPowerManagement.kext?

Did you try the Verbose-Mode?
CMD and V

This error from screen

Beitrag von „ralf.“ vom 11. September 2016, 01:14

Is this, booting with Clover?
Try Clover
