Mod für das H87M-PRO

Beitrag von „LRous“ vom 13. September 2016, 12:52

Guys please help on this topic [Mod für das H87M-PRO](#) . After you apply this mod through USB ASUS Flashback,the computer is turned on, but there is no signal on the monitor.That is corrected in the firmware? 

Beitrag von „jboeren“ vom 13. September 2016, 13:10

After turning the computer on does it respond to the keyboard? Alt-Ctr-Delete to reboot for example?

did you connect your monitor to thr dvi connector?

The monitor is connected as a HDMI-HDMI

Beitrag von „jboeren“ vom 13. September 2016, 13:21

Hdmi should be fine too!

does it respond to the keyboard? Or do you hear the post-beeps?

perhaps wrong nvram settings?

Beitrag von „LRous“ vom 13. September 2016, 13:33

In action from the keyboard it is not responsible. The keyboard light is not lit , too

Beitrag von „jboeren“ vom 13. September 2016, 13:45

i assume did not change/touch anything on the mainboard?

In case of a bad [bios-flash](#) it is possible to remove the bios-chip and to flash a new bios on it!

Beitrag von „LRous“ vom 13. September 2016, 13:51

Restore the BIOS is not a problem, I restored it through this of motherboard function. Just as I understand ozmosis not suitable for my of motherboard?

Beitrag von „jboeren“ vom 13. September 2016, 13:55

as far as i know should ozmosis work on your board... it's better for you to ask [@griven](#) for known problems/solutions!
