amd641 install mac El 10.11.2 parked in the installation interface

Beitrag von „a809281944“ vom 17. September 2016, 11:49

Attach computer configuration diagram

Using the Chameleon boot the installer version 2389

Computer does not support uefi traditional BIOS + MBR mode

Now staying at the installation interface ps / 2 keyboard, USB mouse, but can not move

Try the Enoch Bootloader, and use a modified Kernel

Beitrag von „derHackfan“ vom 17. September 2016, 12:21

Hallo und Herzlich Willkommen im Forum.

Follow the El Capitan AMD Install Preparation [Tutorial](#) from Shaneeee.

Beitrag von „a809281944“ vom 17. September 2016, 15:02

Thank You. This is a USB based on the original start production, video board installed does not support GPT disk partition, UEFI boot only give up this way

Beitrag von „derHackfan“ vom 17. September 2016, 18:02

Sorry, i don't understand you, is that a question or statment?

Beitrag von „a809281944“ vom 18. September 2016, 00:21

Yeah It's a question

Beitrag von „ralf.“ vom 18. September 2016, 00:29

i don't understand you too

try the Enoch Bootloader, and use a modified Kernel. Install Enoch in Legacy Mode

The PS2 Problem: Use a voodooPS2.kext

Beitrag von „a809281944“ vom 18. September 2016, 00:52

I'm trying to replace VOODOOPS2.kext USB mouse is not working

Beitrag von „ralf.“ vom 18. September 2016, 01:32

try the USBInjectall.kext for USB

Beitrag von „a809281944“ vom 18. September 2016, 16:31

The same results. I have a question PS2 Keyboard + USB mouse 10.10.4 10.11.2 does not work properly is the core problem lazy mirroring one bar

Beitrag von „al6042“ vom 18. September 2016, 16:54

For PS2 Keyboards you need VoodooPS2Controller.kext.

Beitrag von „a809281944“ vom 18. September 2016, 17:45

I guess will not be lazy version of the mirror in question re-download and write to the harddrive removal AMD, AppleUSB, IOUSB containing these letters folder also deleted the word NV graphics driver well into the installation interface and no effect
