## iMessage

### Beitrag von „Pietra“ vom 4. Februar 2017, 13:12

iMessage for iPhone iMessage works, but sometimes a message appears saying that the phone number is not registered in iMessage

Did you follow the [iMessage guide](#)?

<https://www.hackintosh-forum.d...194-iMessage-Facetime-Co/>

I did not use

this guide, I just used the clover configurator, the iMessage is working only sometimes this message appears, saying that this address is not registered in iMessage!

This indicates that the iMessage service sometimes is not fully activated. Please make sure that you use plausible and consistent values for SMUUUID, MLB and Rom. If you use Clover generate an UUID and put it in the Smbios and SystemParameters section. To generate your UUID you might use the terminal command `uuidgen` (just copy it over to your config.plist) or let clover configurator do this job (make sure you use the latest version)...
