Hello AceWeal,
You can test this EFI folder. It is for my ASUS P8H77-M PRO, but should also work with your Asus p8z77m pro.
RT Variables and System Parameters I have changed different to my one.
Regards wl_michael

Hello this realy work. Thx you

Beitrag von „anonymous_writer“ vom 20. März 2017, 20:10

One point I've forgotten.
I have a Intel i7 3770 on the Mainbord. You have Intel i5 3570k.
In the Folder /EFI/CLOVER/ACPI/patched there is one file named SSDT.aml. Please delete this file, this is for my I7.
You can create a new one if need by follow this link.
