## macOS High Sierra 10.13 Beta (Full HD + SSD/HDD)

Beitrag von „Pietra“ vom 18. Juni 2017, 16:19

MacOS High Sierra 10.13 works in HD?

---

Beitrag von „kuckkuck“ vom 18. Juni 2017, 16:25

Do you mean with High Definition resolution on your screen or on a Hard Disk Drive (HDD)? 😄

---

Beitrag von „derHackfan“ vom 18. Juni 2017, 16:41

Hallo @Pietra ich habe aus deiner Überschrift (your heading) 10.13 mal etwas mehr gemacht ... 👍

I guess he meant HDD and yes of course HighSierra works also with spinning disks 😄  
If you plan to use a spinning Disk make sure you use HFS+ instead of APFS since APFS does not perform well on spinning Disks at least right now (it's not really made for them). HighSierra can be installed on HFS+ or APFS formatted drives 😄

Does Imessage and Face Time already work on High Sierra 10.13 using Clover ...?

---

**Beitrag von „griven“ vom 1. Juli 2017, 00:38**

Yes they just work like they used to do in Sierra before 😄

Wanted to know if you can use a 12-digit serial number with a 13-digit MLB to activate Imessage and Face Time?

Should work as before as well...
