`Erledigt` PJALM websites account suspended

Beitrag von „cehos" vom 15. Oktober 2017, 11:07

Hi everyone,

I can`t see the repos from PJALM in MaciASL. If I try to open PJALM websites it`s not possible. There is Account Suspended. Contact your hosting provider for more information. Don`t you someone know why was this websites blocked? Don`t you have someone backup of this websites or all patches?

cheers
Cehos

... [MaciASL](#) ...

Beitrag von „al6042" vom 15. Oktober 2017, 11:20

Hi and welcome to the forum... 🙂

Try the maciasl-Config-file from the following post:
[MaciASL](#)

Steps:
- close Maciasl
- rename the original file in ~/Library/Preferences/org.rehabman.githib.MaciASLv1.31.plist to "org.rehabman.githib.MaciASLv1.31-org.plist"

- copy the new plist file to ~/Library/Preferences
- start Maciasl and check the availability of the patches.

Thank you so much al6042 ... 🙂

I put file from link to Preferences folder but it doesn`t work because I used direct url address to PJALM websites (for example http://pjalm.com/repos/intel9). So I have to go to org.rehabman.githib.MaciASLv1.31.plist file and I find right link address in sources and fix url in Preferences in MACiASL: http://maciasl.sourceforge.net/pjalm/repos/intel9 and viola it works. I write it only for other people whitch have same problem.

If the new file copied over, but Maciasl shows the old links in its preferences:
- close Maciasl
- reboot the machine
- copy the new file to ~/Library/Preferences
- start Maciasl and check the new links in preferences

Make sure you do not have "Reopen windows when logging back on" active...
