Erledigt OS X 10.11.6 error something

Beitrag von „shou" vom 6. Februar 2018, 15:48

+how to fix this error when i boot in hackitosh and i can't used driver cmsvideo

+i used sysnaptouchpad and i disable but when i restart os i have to turn it off again

+ brightness constantly changing when i restart os although I was only at the lowest level

this   is   my   EFI   folder   and   my   system   report   (
https://drive.google.com/file/...v19XW1j1/view?usp=sharing)

please check and help me fix

sorry my english is not very good It's really bad ☹
