Please help create Bios Mod AsRock B250 PRO4

Beitrag von „siparis515“ vom 4. Juli 2018, 18:05

Hello, can you create me Bios mod with Ozmosis(ozmosis and kexts are in ffs.zip)?
Motherboard is Asrock B250 PRO 4. Thank you very much!!!!!!

Hello and welcome to the forum... 😊

There is currently no way to add the Ozmosis-based ffs-files in UEFI-Roms of Sky-, Kaby- or Coffee-Lake-Mainboards.

All the tools which were used to create Ozmosis-ROMs prior to Sky-Lake-Boards are not able to save the patched ROM for this newer models.

The operation leads to an unusable ROM-File...

Which means:

Nope, no chance... Sorry
