porblem ozmosis ga-z97mds3h

Beitrag von „Avenir11“ vom 4. Oktober 2018, 04:31

After firmware Z97MDS3H.F7-XMAX.rom I can not go into the bios setup. The BIOS just hangs on entry. Is there a solution to my problem?[/color]

BITTE

So your computer doesn't do anything? Did you try to clear the cmos memory?

Beitrag von „cehos“ vom 4. Oktober 2018, 13:02

Hi,

At first, try to clear CMOS (CLR_CMOS). There are two pins on your motherboard. If this doesn't help try to load second Bios: start your PC with long holding Power Button. Your mother board will automatically load second Bios.

good luck
