Dual Boot - OSX not recognized by Clover

Beitrag von „fborensz“ vom 24. November 2018, 18:56

Hello everyone !

I have a duaboot on clover with OSX and Windows. Yesterday, OSX asked me to upgrade to Mojave... and I clicked yes.

It took around around 1hr to install. I had nothing to do.

But after reboot, on Clover page, I only have windows choice, and no OSX... COuld anyone help me ?

Thank you !

Du musst deinen [Clover Bootloader](#) aktualisieren und wegen APFS den ApfsDriverLoader-64.efi installieren und dein SMBIOS mit dem [Clover Configurator](#) aktualisieren.
