Stuck in "pci (build 23:" intel core i5 hd5500 nvidia geforce 920M high sierra 10.13

Beitrag von „Hoangthu117“ vom 15. März 2020, 10:03

Hello everybody.

I have a problem with this error: stuck at "pci (build...".

Hope for the support of everyone

Hi and welcome to the forum... 😊

there is no error in your screenshot, just informations about the boot process.

Also:

Please state your hardware credentials either in your signature or your profile, within the section "About me".

Otherwise no one will be able to help you any further.

There is no need to open another thread...

please stay in your first one.
