

Install Catalina on Lenovo Ideapad s145 i7-1065G7

Beitrag von „TUNIN96“ vom 16. April 2020, 15:27

Hello guys, I would like to install Catalina on my laptop. I tried with clover in uefi mode and I had this error([Pic](#)). Now I'm trying with opencore, bit without results.

I'm following this guide: [Guide](#).

But my ssdts file names are different from those in the guide. Could you help me, please?
Thanks.

Beitrag von „Boardman“ vom 16. April 2020, 15:39

try this for the install and give feedback

Beitrag von „TUNIN96“ vom 16. April 2020, 15:45

I tried, but it goes in kernel panic and restarts.

Beitrag von „Boardman“ vom 16. April 2020, 16:45

i am a noob with OpenCore

here is clover folder

good luck

Beitrag von „TUNIN96“ vom 16. April 2020, 17:27

Nothing... I have this error and then it restarts.

Beitrag von „al6042“ vom 16. April 2020, 18:43

Hi [TUNIN96](#) and welcome to the forum... 😊

This old MacbookPro8,1 SMBIOS cannot be used with Catalina, since the model's latest macOS is High Sierra.

That's the info in your picture.

Since the 10th gen CPUs are currently not support from macOS this might get a little tricky.

Please try the attached EFI, which contains the SMBIOS of the current MacbookPro16,1, but with a faked internal Graphics setup in hopes that it might help to get a working picture in Catalina at all.

Also be aware, that your Laptop does not have a built-in network card and the Wifi/Bluetooth thingie might not be supported.

Beitrag von „TUNIN96“ vom 16. April 2020, 18:56

Edit by al6042 -> Please do not quote posts, which are located directly before your post...

Thank you, but I always have that error.

Beitrag von „Boardman“ vom 16. April 2020, 19:43

are you sure that you have got the correct [bios settings](#)?

Beitrag von „TUNIN96“ vom 16. April 2020, 20:08

Yes, I am.

Beitrag von „al6042“ vom 16. April 2020, 20:21

The same error with the same message?

Code

1. This version of Mac OS X is not supported on this platform!
2. Reason: Mac-942459F5819B171B

if so, you did something wrong while copying the contents of the EFI.zip.

If you have an EFi-folder on your EFI partition, rename it to "EFI-old" before you copy the contents.

Beitrag von „TUNIN96“ vom 16. April 2020, 20:44

Zitat

This version of Mac OS X is not supported on this platform!

Reason: Mac-942459F5819B171B

No that error. I meant this error: [Pic](#)

Beitrag von „al6042“ vom 16. April 2020, 20:59

Please post pics within the forum and don't use filehosters.

No one will be able to recreate the situation if the file is lost...

Thank you

Beitrag von „TUNIN96“ vom 16. April 2020, 21:26

Ok...sorry. I'm trying this guide with opencore: [Guide](#). But I don't know how to set framebuffermem, stolenmem,etc. Please, help me. Thnaks.

UPDATE: My laptop gets stuck here now.

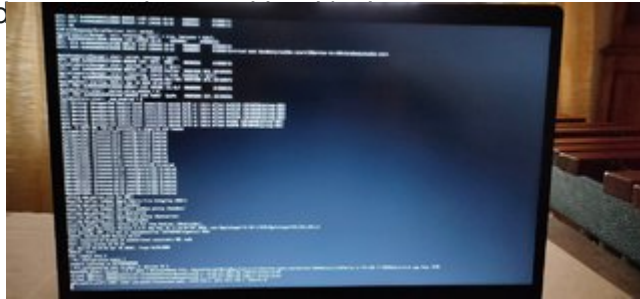

Beitrag von „danielehrhardt“ vom 19. Mai 2020, 01:40

Did you fixed the Problem?
I have the same Issues

Beitrag von „TUNIN96“ vom 30. Mai 2020, 12:26

Hello guys, my laptop gets stuck here. I'm using clover and I uploaded my efi folder.

As you can see in my efi folder, I tried

Could you help me, please? Thanks.

Beitrag von „CMMChris“ vom 30. Mai 2020, 15:02

Try AWAC ACPI patch

Find* [HEX] =A00A9353 54415301

Replace* [HEX] =A00A910A FF0BFFFF

Comment = Disable AWAC

Beitrag von „TUNIN96“ vom 31. Mai 2020, 14:45

Guys, I arrived to the installation but I have another problem.

I just uploaded my new efi folder.

After I select hd the installation starts and after some minutes it shows me an error.

An Error Occurred While Preparing the Installation

Beitrag von „CMMChris“ vom 31. Mai 2020, 17:49

Please check the log, make sure to display all messages to see where it's stuck.

Beitrag von „TUNIN96“ vom 31. Mai 2020, 21:14

I uploaded the Installer log.

Beitrag von „TUNIN96“ vom 10. Juni 2020, 16:37

Hello guys, I installed Catalina on my laptop but when I boot from the disk with my usb installer it goes in panic.

Beitrag von „CMMChris“ vom 10. Juni 2020, 16:49

1. Your picture does not contain any relevant data regarding the panic
2. Without knowing the exact hardware nobody can help you
3. Without uploading your EFI nobody can help you

In most cases a kernel panic while booting the installer is related to incorrect IGPU configuration.

Beitrag von „TUNIN96“ vom 10. Juni 2020, 16:53

Intel i7 1065g7.

Beitrag von „Raptortosh“ vom 10. Juni 2020, 16:56

And which Notebook?

Beitrag von „TUNIN96“ vom 10. Juni 2020, 17:06

Lenovo Ideapad s145

Beitrag von „Raptortosh“ vom 10. Juni 2020, 17:08

And what other Hardware? Please write this in your Signature!

Beitrag von „TUNIN96“ vom 10. Juni 2020, 17:12

8GB RAM

256GB WDC SN520 NVME

Beitrag von „g-force“ vom 10. Juni 2020, 19:02

[TUNIN96](#) I put all your questions and answers together in one thread. You opened up 3 threads with nearly the same errors with the same hardware, please stay in this thread now.

If someone asks you for information please write your answer in a whole sentence, we are humans, not robots.

Beitrag von „TUNIN96“ vom 10. Juni 2020, 19:07

Sorry, I did that because I solved other threads problems and now I'm having this new problem.

Beitrag von „TUNIN96“ vom 14. Juni 2020, 09:23

How can I patch my igpu? I tried with hackintool, but it gets stuck on tx_flush or goes in kernel panic.

Beitrag von „kesch“ vom 23. Juli 2020, 19:40

Hey. Have you made it? I have the same laptop. I am thinking about buying a WiFi Card for it to use MacOS. But its quite expensive and I dont know if I am able to run MacOS on it.

On my PC with B450M, Ryzen3600 and Radeon RX5700XT I got MacOS Catalina running, but I would like to take it with me.
