Kext SNBGraphics FB troubles, duplicat

Beitrag von „OMWO“ vom 7. Januar 2021, 13:42

Hello,

I wish you all first an happy new year!

Well, my Mountain Lion was perfectly working and "something happened" which created the following mistake.

Hopefully I can start in Safe mode with the -v -x command.

Is there a possibility to repair this mistake from the Safe mode?

What should I do? Is there someone here who could help me?

Thanks in advance,
