

sound problem with Big Sur 11.4

Beitrag von „muad“ vom 2. Juli 2021, 02:04

I am new in Hackintosh , audio do not work.

voodooohda.kext do not work too. It says 'no voodooohda detect'.

My laptop is Toshiba Satellite S55-A,

Motherboard is Intel VG10F,

processor is I7-3630M,

sound card is Intel Panther Point PCH-High Definition Audio Controller [C1].

plz help me

[muad](#)

Quale sistema operativo?

Da dove hai preso il sistema operativo?

Quale bootloader? Opencore o Clover?

Alcuni componenti hardware non funzionano con Mac OS.

I notebook di classe business di Lenovo o Dell lavora migliori.
