

Dell Latitude 7280

Beitrag von „Hecatomb“ vom 3. August 2021, 20:48

Dell Latitude 7280

- Intel Core i7-7600u
- Intel UHD Graphics 620
- 16 GB Arbeitsspeicher
- Toshiba NVMe 256GB
- Audio Device Realtek ALC3246
- macOS Monterey
- SMBIOS MacBookPro15,2
- OpenCore Version 0.7.6

Was geht

- FN Tastensteuerung
- Sleep/Wakeup geht
- Touchpad Multitouch

INFO: Der AlpsHID.kext für Multitouch funktioniert nur mit dem beiliegenden VoodooCHID.kext

Thanks,

I have the exact same model.

The SMBIOS in the config is actually 15,2 not 13,2.

I will try and let you know with the results.

[takobaba](#)

Welcome to the forum and thanks for the Info...

Since [Hecatomb](#) 's signature contains also MacBookPro15,2 as the SMBIOS model for his Latitude 7280, I changed the detail in his post.

Beitrag von „Hecatomb“ vom 6. August 2021, 15:35

Thanks for the info. At moment I am in hospital and can't check it

Beitrag von „al6042“ vom 6. August 2021, 15:43

We've got you covered...

Get well soon. 🙏🤞

Beitrag von „Hecatomb“ vom 6. August 2021, 20:25

[takobaba](#) yes, smbios MacBookPro15,2 will work correctly. If you got problems with installation you can contact me.

Beitrag von „Hecatomb“ vom 11. August 2021, 22:23

Update auf OC 0.7.2 Online !!!

Beitrag von „takobaba“ vom 12. August 2021, 03:19

yes it worked for me too, thank you so much [Hecatomb](#)

Here is my EFI, I decided to keep it all in one thread, let me know if its better to create a new thread.

I have basically the same laptop as [Hecatomb](#) but only with i5 7300U CPU and with 1366x768 Screen.

Pretty much everything works,

trackpad,

audio(alcid=21),

wifi,

fn keys for brightness and volume,

except sleep, I am still working on that.

HDMI ports dont work so I had to change the vga port details to same as [Hecatomb](#)'s EFI.

I guess its best for people to just use the EFI from the author not mine
