

# Problem with booting macOS Monterey

**Beitrag von „Elgzar2“ vom 17. Januar 2022, 18:55**

Hello

I've tried to install MacOs Monterey using recovery files com.apple.recovery.boot

and i got this error in the attached image

any ideas ??

Thanks

I uploaded the efi folder to you

Thanks

hmmm ... [bios settings](#) ?

can you tell me why the internet doesn't work

thanks

---

## Beitrag von „kaneske“ vom 17. Januar 2022, 22:10

Because your nic isn't loaded properly. Add a matching Kext or Config so macOS can use it.

[https://github.com/Mieze/RTL8111\\_driver\\_for\\_OS\\_X](https://github.com/Mieze/RTL8111_driver_for_OS_X)

I think this one will work... But not sure

## Beitrag von „Elgzar2“ vom 20. Januar 2022, 19:26

Hello

I have posted before that i have a problem with my internet connection through my on board lan

the problem is in the lan card itself it isn't working because i don't use it for a long time

I have a wireless lan card that i use already to connect to the internet

The question is how can i use it to complete the installation

My system configuration is:

Amd fx6300

Rx 570 4gb

12 gb ram

You can see the attached image to know the wireless lan brand

Thanks

hello [Elgzar2](#) ,

your screenshot , systeminfo is worthless, without knowing your exactly software (for example current bootloader, osx-build-version) , hardware specs (for example nic, mainboard.. ) we could not help neither nor less.

please do following steps :

- 1,- boot directly to windows- -not- with the oc or clover bootpicker - use for example hwinfo64 (download it before) , save the log, up it to the post here.
- 2. - fill in the system hw specs into your signature, profile - that will help you -for now and later, also the helpers

indeed, we do not sit behind or beside you, so we could not know this all by default , so this informations are needed to operate

thanks,

Alles anzeigen

The Specs updated on the signature

an here it is again

ASUSTeK M5A97 R2.0

- AMD FX-6300

- 12.0GB Dual-Channel DDR3

- ATI Radeon RX 570 4Gb

- Realtek High Definition Audio

i'm trying to setup mac os monterey with opencore 0.7.7

Thanks for your help

---
