

failed load image-unsupported

Beitrag von „adings“ vom 9. März 2022, 17:41

I got an issue with my hp 14-d012tu device.anyone can help me please? here my config.plist build. Does it the right build for my device?

or my device not support to install hackintosh?

somebody please build the OC for me 🙄

Try booting with the EFI 😊

Beitrag von „adings“ vom 9. März 2022, 18:16

oh so much peasure.thanks there.i'll try this

sory for bothering you again.is this still working or stucked?

and also why the bootpicker doesn't show up ?

i mean i want to make it dual boot with my windows 10.

thanks again.

How long have you waited , the bootpicker comes there after

Beitrag von „adings“ vom 10. März 2022, 01:23

it's not show up till now anyway.and it is stuck on the screen just like before.

[adings](#)

please stay at your thread, the helpers are here if they have time for that

i'll not help you, neither pm nor pinnboard - in case, only at a thread like this

thx
