

Lenovo g70-70 audio and wifi not working

Beitrag von „Arton2020“ vom 4. Juni 2023, 18:03

I managed to install Ventura on Lenovo g70-70 but audio and wifi don't work

Is it possible to run at least

hello [Arton2020](#) ,

unfortunately, the crystal ball is broken right now and more detailed information as well as the efi would be great, please attach it as a zip file in the thread so that a more precise cause of the error can be assessed.

thx 😊

btw. you will need the intel drivers fpr wlan/bt functionality

EFI

ventura works on this efi

I care first about audio wifi rather it doesn't work on big sur I was able to start wifi

that's the way you'll go -> <https://dortania.github.io/Opencore-laptop.plist/haswell.html>

please inform yourself for example via the dortania guide, more about hackintosh-osx86, so you will understand why things- run or don't
