

# MacOS Monterey Dell XPS 17 9700 Sound / Wi-Fi / Bluetooth

Beitrag von „arslana“ vom 10. Juni 2023, 09:15

Hi admin and other respected people here,

I installed MacOS Monterey 12.6.5 and then installed Windows 11 Pro on separate partitions. Both works smoothly under dual boot, but I have no Wi-Fi, sound and Bluetooth on macOS Monterey. I just wonder if I could get some valuable help from you about these issues.

Dell XPS 17 9700 Laptop

Processor : Intel Core i9-10885H CPU 2.4GHz 10th Gen

Code name : Comet Lake

Memory : DDR4 64GBytes

GPU : NVIDIA GeForce RTX 2060 with MAX-Q

Graphic Processor : Intel® UHD Graphics for 10th Gen Intel

GPU Memory : 6GBytes / GDDR6

Bluetooth : Qualcomm QCA39x Bluetooth 5.1 Adapter

SSD : PM9A1 NVMe Samsung 2048GB

Network Adapter : Killer Wi-Fi 6 AX500-DBS

Audio : Realtek High Definition Audio Driver

Sound: Intel Comet Point-H PCH - cAVS (Audio, Voice, Speech) PCI

Device Description : nVIDIA TU106 - High Definition Audio Controller

Hardware ID PCI\VEN\_10DE&DEV\_10F9&SUBSYS\_098F1028&REV\_A1

can you upload your efi, or config please?

---

**Beitrag von „arslana“ vom 10. Juni 2023, 09:57**

Sure, I am sending you them asap. These are the config.file and efi.

This is the Laptop [Dell XPS 17 9700 \(3NJ83\)](#)

For bluetooth you need to deactivate the bluetoothinjector.kext, and need to add Bluetoothfixup.kext too.

For wifi you need the kext for your macOS that you use...  
<https://github.com/OpenIntelWireless/itlwm/releases> hope the wifi is supported , not sure

All other infos you can read in the link that I posted here. Not all will work with this hardware
