

MSI MAG B550 Tomahawk Ryzen 5 3600

Beitrag von „notDeviiL“ vom 14. Juli 2023, 22:58

Hello, do someone have an EFI that works for Big Sur, Monterey or Ventura on this setup? I've tried like 30 EFIs or more but i cannot get into the installation progress..

Regards.

hey [notDeviiL](#) ,

there is a quite and well known way to assure, that the efi fits, there is even a guide how to do it, cool-isn't it?

just take a look at- <https://dortania.github.io/OpenCore-Install-Guide/>

follow the guide and section for ryzen- well done,

help the others maybe helpers by putting your pc spec into your signature or profile.

2nd. advice, take a look at [HowTo: Ryzentosh](#)

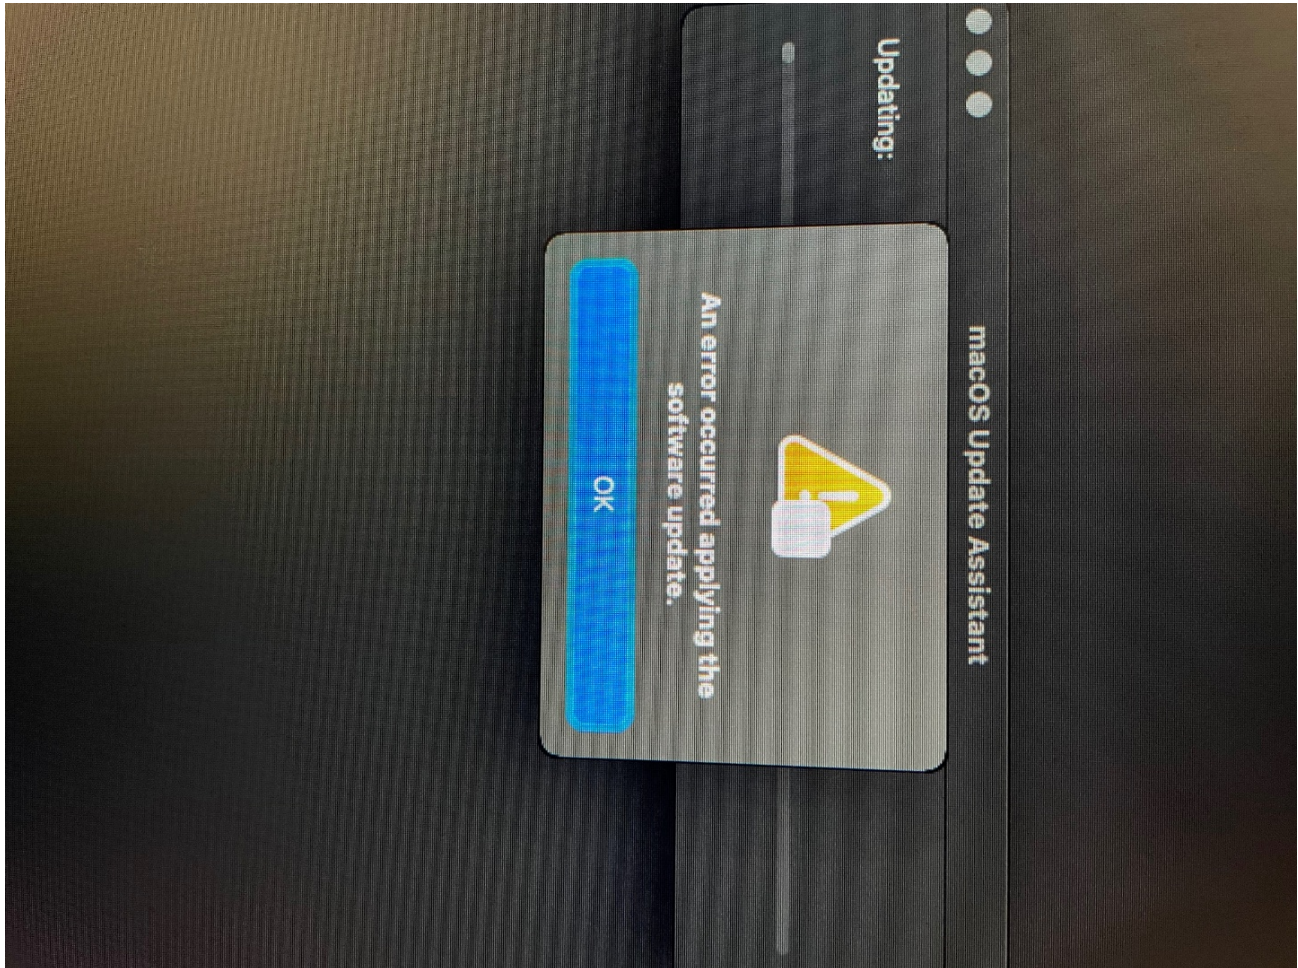

thanks

Hey..

now I got through the setup and got the msg: "An error occurred applying the software update" thats kinda weird because EFI worked fine so far..

Here is my [EFI](#)

Do not open up new threads with the same problem which you already mentioned here!

Stay in this one and wait for a response, instead of pooring your issue all over the forum!

Alles anzeigen

your EFI need an update in opencore and kexts (kexts are pretty old)

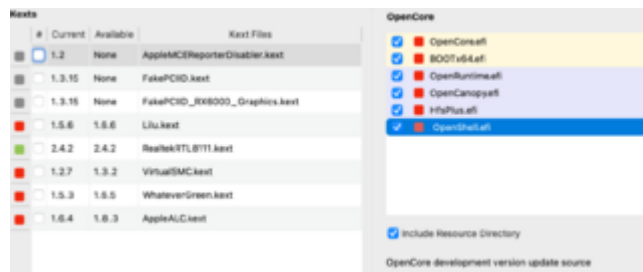

also patches for AMD CPU must be updated if you are trying to update OSX to latest OS available

as side note, i have had many problems to download your EFI from that provider 😊

Okay, thanks for the info. I'll update it and try it out thank you

Edit: It worked! Thanks! I have the problem now that my RX 6600 is not showing up in the system. Do you know this Problem aswell ?

Beitrag von „fabiosun“ vom 28. Juli 2023, 16:32

[notDeviil](#) your GPU needs a newer OSX

no driver for Big Sur

You'll need at least macOS Monterey für the 6600/6600 XT

I did it guys! Thanks for the help. But now my Tosh is rebooting out of nowhere

Beitrag von „Hecatomb“ vom 28. Juli 2023, 22:18

Bitte was? Booting out of ?

Beitrag von „notDeviiL“ vom 28. Juli 2023, 22:36

aus dem nichts

Beitrag von „Hecatomb“ vom 28. Juli 2023, 22:38

beim booten, oder im System? wie lange dauert es bis es passiert? unregelmäßig , oder nach dem start in einer gewissen zeit?

Beitrag von „notDeviiL“ vom 29. Juli 2023, 08:55

Es passiert unregelmäßig. Bis ich ins OS komme startet er auch 2-5 mal neu, manchmal aber auch direkt

Beitrag von „fabiosun“ vom 29. Juli 2023, 14:44

[notDeviiL](#) which EFI are you using? and which lan?
