

File package for Ozmosis

Beitrag von „pupokass“ vom 1. August 2024, 14:54

For those who do not want to search for all files on the Internet I publish a large package of ffs files for Ozmosis in this package there are such files as OpenPartitionDxe,OpenHfsPlus,latest Ozmosis version by [hyux1](#) and so on. See the screenshot for the rest of the files.All files are of the latest versions.According to the developer of this version of Ozmosis this version does not need

Kernel works well without KernnextPatcher but without DarBoot I suggest you try booting without DarBoot if something goes wrong without DarBoot working download it here again I reconfigured

it!
